

EXPERIENCE

- Yapı Kredi Teknoloji**, Expert R&D Engineer, İstanbul, Turkey **July 2018 – Present**
- Developing state-of-the-art machine learning models for credit card and cross-channel fraud detection which are challenging problems due to highly unbalanced data and real-time requirement.
- Koç University Parcorelab**, Research Assistant, İstanbul, Turkey **June 2015 – April 2019**
- Implemented TiDA-C++, tiling based multi-threaded programming model to increase cache performance with data locality and manage parallelism. TiDA achieves up to 2.10x speedup over OpenMP and resulted in publication at ISC'16.
 - Designed and developed TiDA-acc. TiDA-acc is a tiling-based GPU programming model which manages distinct address spaces, successfully hides transfer latency between CPU and GPU, automatically generates GPU code, handles cases where there is no sufficient GPU memory and is published at ICPP'17.
 - Integrated TiDA-acc to SMC, a combustion simulation consisting of approximately 10,000 lines of code, and presented an article and a poster about the study at BAŞARIM'17, Turkey's national HPC conference.
 - Developed a tiling-based high-level asynchronous programming model for GPU clusters using TiDA-acc. On top of TiDA-acc, it utilizes all GPUs (and CPUs) in the system, overlaps any type of communication with computation and achieves good speedup. The study is published at HPCAsia'20.
- Koç University**, Teaching Assistant, İstanbul, Turkey **Sept 2016 – July 2018**
- Assisted in teaching, supervision and assessment of Computer Architecture, Operating Systems and Parallel Programming courses, and received Teaching Assistant Training Certificate.
- Lawrence Berkeley National Laboratory**, Research Assistant, Berkeley, CA, US **July - Sept 2016**
- Studied existing GPU execution models and SMC implemented with AMReX, an AMR framework from Berkeley Lab, implemented GPU version of SMC kernels, and collaborated on TiDA-acc design.
- Vestel R&D**, Software Engineering Intern, İstanbul, Turkey **Aug 2015**
- Developed proof of concept applications for Android platform.
- Netaş**, Software Engineering Intern, İstanbul, Turkey **June - Aug 2014**
- Analyzed and configured static code analysis tools to be integrated to continuous delivery project.

EDUCATION

- ❖ **Koç University**, Graduate School of Sciences and Engineering, İstanbul, Turkey **2016 - 2019**
Master of Science in Computer Science and Engineering, GPA 3.88/4.00
Thesis: Tiling-Based Programming Model for GPU Clusters Targeting Structured Grids
- ❖ **Koç University**, College of Engineering, İstanbul, Turkey **2010 - 2016**
Bachelor of Science in Computer Engineering, Double Major (BSc) in Industrial Engineering,
Track Certificate Program in Software Engineering, GPA 3.18/4.00

PUBLICATIONS

Conference Proceedings

- **B. Bastem**, D. Unat, "Tiling-Based Programming Model for Structured Grids on GPU Clusters, International Conference on High Performance Computing in Asia-Pacific Region (HPCAsia), Fukuoka, Japan, January 2020

HONORS AND AWARDS

- Research Project Scholarship Recipient, Prof. Didem Unat via TÜBİTAK **2016 - 2018**
- Half Merit Scholarship Recipient, Koç University, İstanbul, Turkey **2010 - 2016**
- Dean's Honor Roll, Koç University, İstanbul, Turkey **Fall 2014, Fall 2015, Spring 2016**
- Vehbi Koç Scholar, Koç University, İstanbul, Turkey **Spring 2014, Spring 2015**

SKILLS

- Language:** Turkish-Native
English-Advanced
- KAPLAN International Certificate of Achievement, New York City, NY, US **Summer 2012**
- Computer:** - Python, C++, C, Java, Julia, Objective-C, SQL, HTML, CSS, PHP, MATLAB – Scikit-Learn, Pandas, Redis, Keras, CUDA, OpenACC, MPI, OpenMP, Pthreads, Knet, OpenCV, OpenGL - Linux, iOS, Android
